

CCOC -- Review Organization Meeting

23 August 2013

11:30-1
254 Rose Administration

Draft of Minutes

In attendance --

CCOC Members: Marsh Adams, Beth Bennett, Kathy Bolland, Kim Campbell, David Cordes, Ryan Earley, Maurizio Godorecci, Dave Heggem, Brenda Hunter, Kurt Morton, Mark Nelson, Cathy Pagani, Rebecca Pow, Cynthia Sunal, Ray White, Liza Wilson, Tom Wilson, Tricia Witte, Z.J. Wu

Student Representatives: Camden Adrian, Mackenzie Brown, Sam Creden, William Howard Stephens

1. Mark Nelson welcomed new CCOC members and student representatives to this year's committee and provided a brief history of the Core Curriculum at the University of Alabama and of the mission of the Core Curriculum Oversight Committee (CCOC).
2. Beth Bennett discussed the on-line process used by the CCOC for conducting course reviews and reviewed the timeline for the 2013 CCOC course review:

15 September – final date for department heads to submit for the 2013 review

27 September – CCOC meeting to discuss status of subcommittee work

18 October – official vote on completed reviews

8 November – CCOC meeting to discuss status of subcommittee work and to report on any resubmissions

6 December – CCOC meeting, if needed, to complete the review and the final vote

Subcommittee assignments are identified in the attached membership list. Members should wait to begin reviewing submissions until they have received word from their subcommittee chair but should notify Beth if they have any difficulty accessing the review program.

3. Marsha Adams, who co-chairs with Cathy Pagani the SACS General Education Assessment Planning committee, presented an initial plan for general education competencies and their assessment, based on the *Principles of Accreditation Comparison*, 2005 and 2012 (attached).
 - a. She explained that the review work of the CCOC has the institution well prepared for reporting on 2.73 *General Education*, under Core Requirements.
 - b. What we need to address now is 3.5.1 *General Education Competencies*.
 - i. To begin, the committee, which includes Kathy Bolland and Beth Bennett, proposed that the CCOC examine courses reviewed between 2009-12, which are also approved by the AGSC (Alabama General Studies Curriculum) as general education courses in Area II

(Humanities and Fine Arts), Area III (Mathematics and Natural Science), and Area IV (Social and Behavioral Sciences) – see attached list.

- ii. Based on the outcomes identified in those areas by the AGSC (see *General Studies Curriculum Core*), we will survey our courses for shared learning outcomes and common measures of student learning within Areas II, III, and IV.
 - iii. The goal is to develop for those courses either a common rubric of shared general education outcomes or a set of embedded questions for showing student competencies -- to pilot in Spring 2014.
 - iv. The idea is to gather evidence of general education competency attained at UA, not to assess individual core courses.
- c. David Cordes asked why the CCOC should generate these outcomes from our review of the UA Core Curriculum, rather than use national standards.
- i. Beth responded that generating shared learning outcomes for each core designation has been the plan from the beginning – we are just getting to it sooner than we had expected. It constitutes the next step of assessing our program and what it offers students in terms of general education.
 - ii. She said that while courses in some areas, such as math and science, may easily be served by national standards, others in the humanities and social sciences would not necessarily be well served.
 - iii. Nonetheless, national standards could eventually be used as guides for determining what improvements we might want or need to make.
- d. Marsha reported that initially the committee members would take the lead on trying to identify shared learning outcomes but that all committee members should take a look at the courses that their subcommittee reviewed in the CCOC archive:
- i. Cathy Pagani will review courses with FA designations.
 - ii. Beth Bennett will review courses with HU designations.
 - iii. Marsha and Kathy Bolland will review courses with SB designations.
 - iv. She asked ZJ Wu and his subcommittee to help with the MATH/NS courses.
- e. There will be some time at the next CCOC meeting given to discuss reports on our initial findings.
- f. The SACS planning committee report is due in December.
4. Beth Bennett confirmed the Fall meeting dates are all on Fridays, 11:30-1, in 254 Rose: 27 September, 8 November, 6 December (if needed)

Meeting adjourned at 1:00 p.m.

8/23/2013

**PRINCIPLES OF ACCREDITATION COMPARISON, 2005 AND 2012
General Education**

2005 Principles	Fifth-Year Interim Report 2010-11	2012 Principles
2. Core Requirements		2. Core Requirements
<p>2.7.3 (General Education) requires in each undergraduate degree program the successful completion of a general education component at the collegiate level that is (1) a substantial component of each undergraduate degree, (2) ensures breadth of knowledge, and (3) is based on a coherent rationale. For degree completion in associate programs, the component constitutes a minimum of 15 semester hours or the equivalent; for baccalaureate programs, a minimum of 30 semester hours or the equivalent. These credit hours are to be drawn from and include at least one course from each of the following areas: <u>humanities/fine arts</u>; <u>social/behavioral sciences</u>; and <u>natural science/mathematics</u>. The courses do not narrowly focus on those skills, techniques, and procedures specific to a particular occupation or profession. The institution provides a written justification and rationale for course equivalency.</p>		<p>* 2.7.3 (General education) In each undergraduate degree program, the institution requires the successful completion of a general education component at the collegiate level that (1) is a substantial component of each undergraduate degree, (2) ensures breadth of knowledge, and (3) is based on a coherent rationale. For degree completion in associate programs, the component constitutes a minimum of 15 semester hours or the equivalent; for baccalaureate programs, a minimum of 30 semester hours or the equivalent. These credit hours are to be drawn from and include at least one course from each of the following areas: <u>humanities/fine arts</u>; <u>social/behavioral sciences</u>; and <u>natural science/mathematics</u>. The courses do not narrowly focus on those skills, techniques, and procedures specific to a particular occupation or profession. If an institution uses a unit other than semester credit hours, it provides an explanation for the equivalency. The institution also provides a justification if it allows for fewer than the required number of semester credit hours or its equivalent unit of general education courses.</p>

New Standard or Requirement: 

Revised Standard or Requirement: 

*Denotes standards that will be reviewed by the on-site Review Committee even if the off-site review determined compliance.

PRINCIPLES OF ACCREDITATION COMPARISON, 2005 AND 2012
General Education

<p>3.5.1 (Competencies within general education core) The institution identifies college-level competencies within the general education core and provides evidence that graduates have attained those competencies.</p>		<p>3.5.1 (General education competencies) The institution identifies college-level general education competencies and the extent to which students have attained them.</p>

Areas I-V

NOTE: To facilitate the development of a statewide transfer/articulation program, the AGSC created the following five areas that outline the minimum general academic content that is covered in the freshman and sophomore years prior to transfer to a four-year institution in Alabama. All the transfer guides (except for Engineering) follow these area guidelines. For more information about the Engineering differences, [click here](#).

General Studies Curriculum Core (41-42 SH)

Forty-one to forty-two semester hours of credit in general studies core courses have been approved by the Articulation and General Studies Committee. The general studies curriculum core includes study in the areas of written composition, humanities and fine arts, natural sciences and mathematics, and history, social, and behavioral sciences.

AREA I - Written Composition (6SH)

Effective written communication skills are essential in a literate society. Minimum requirements include at least 6 semester hours in written composition.

AREA II - Humanities & Fine Arts (12SH)

Study in the humanities addresses the ability to deal with questions of values, ethics, or aesthetics as they are represented in literature, philosophy, religion, and the arts, and is fundamental to general education. Minimum requirements include at least 12 semester hours in humanities with a minimum of 3 semester hours in literature*, 3 semester hours in the arts, and the remaining semester hours from the humanities

and/or fine arts. In addition to literature, disciplines in the humanities include, but are not limited to, philosophy, religious studies, speech, foreign languages, art, music, theatre, and dance.

Courses should be broad in scope and content rather than specific and should emphasize a global perspective. Courses in the arts should emphasize history and appreciation rather than performance. Examples in the humanities and fine arts include, but are not limited to, world literature, art history, music appreciation, comparative religions, and history or origins of dance.

*As a part of the General Studies Curriculum, students must complete a 6 semester hour sequence either in literature (Area II) or history (Area IV).

AREA III - Natural Sciences & Mathematics (11-12 SH)

Study in the natural sciences and mathematics emphasizes the scientific method and applies quantitative or inductive reasoning. Minimum requirements include at least 11 semester hours with at least 3 semester hours in mathematics** at the pre-

 calculus algebra level or Finite Mathematics level unless otherwise specified and at least 8 semester hours in the natural sciences which must include laboratory experiences. Disciplines in the natural sciences include but are not limited to, astronomy, biology, chemistry, geology, and physics.

**Some mathematics courses are offered for 4 semester credit hours. This would account for the variation in hour requirements in Area III.

AREA IV - History, Social, & Behavioral Sciences (12 SH)

Study in history and the social and behavioral sciences deals primarily with the study of human behavior, social and political structures, and economics. Minimum requirements include 12 semester hours with at least a 3 semester hours course in history* and at least 6 semester hours from among other disciplines in the social and behavioral sciences. Disciplines include, but are not limited to, anthropology, economics, geography, political science, psychology, and sociology.

Courses should be broad in scope and content, include global or international perspectives, and must emphasize the methods of inquiry in the social sciences.

*As a part of the General Studies Curriculum, students must complete a 6 semester hour sequence either in literature (Area II) or history (Area IV).

The Maximum Total for AREAS I-IV is 41-42 Semester Hours

Pre-Professional Curriculum (19-23 SH)

AREA V - Pre-Professional, Major, & Elective Courses (19-23 SH)

Area V is designated for courses appropriate to the degree/major requirements of the individual student (it may also include electives*).

*Some institutions may include courses in wellness or physical education.

READ MORE ABOUT AREA V PAGES HERE...

GRAND TOTAL for AREAS I-V: 60-64 SH

Note: For institutions requiring 120 semester hours for graduation the maximum allowable hours for transfer from a community college into a four-year baccalaureate degree program will be 60 semester hours.

ENGINEERING EXCEPTIONS:

For all engineering majors, the AGSC voted to allow the hour requirements in Area II to be reduced from 12 SH to 9 SH and in Area IV to be reduced from 12 SH to 9 SH. This reduction allowed for additional hours (6 semester hours) to be added to Area V for engineering majors so that required math and science courses could be taken prior to transfer that would meet national engineering accreditation standards (ABET).
