New Campus Research Institute

Alabama Water Institute
http://ovpred.ua.edu/alabama-water-institute/
• STEM Forward is a University-wide collective impact initiative aimed at broadening the participation of individuals from groups that have been traditionally underserved and/or underrepresented in STEM.

• STEM Forward uses a holistic system approach to broaden participation and inclusiveness to increase the number of students graduating in STEM disciplines to meet local and national workforce needs.

• Builds upon UA’s capacity to advance knowledge in STEM disciplines and enhance recruitment of students, staff, and faculty such that these populations reflect the diversity of the state and nation.
